Jeffrey Freed and Laurie Parsons provide an effective method for helping children with Attention Deficit Disorder excel in a classroom setting. In straightforward language, this book explains how to use the innovative Learning Styles Inventory to test for a right-brained learning style; help an ADD child master spelling and build confidence by committing complicated words to visual memory; tap an ADD kid s amazing speed-reading abilities by stressing sight recognition and scanning rather than phonics; access the child s capacity to solve math problems of increasing, often astonishing complexity without pen or paper; capitalize on the writing and weaning technique to help the child turn mental images into written words; and win over teachers and principals to the right-brained approach the ADD child thrives on. For parents who have longed to help their ADD child quickly and directly, Freed and Parsons s approach is nothing short of revolutionary. This is the first book to offer them reason for hope and a clear strategy for enabling their child to blossom.
