Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English Brand New Book ***** Print on Demand *****.Excerpt from On Intelligence, Vol. 2 At all events we believe that it is so We predict, by analotrv, the characters of the intermediate in the cases in which it is still unknown 10 us Examples We extend this law by analogy to all points of space and all moments of time 271 II. Groundwork of this induction From our ignorance in certain cases of the explanatory reason, we cannot conclude that it does not then exist The cause of our ignorance is known to us The gaps of science are explained by its conditions Examples To presume the absence of the explanatory reason is a gratuitous hypothesis The presumptions are in favor of the presence of an explanatory reason of which we are ignorant Other presumptions suggested by the example of the sciences of construction In these sciences, every law has its known explanatory reason The gaps of the experimental sciences are caused by their conditions and by the particular turn of their method Proof What geometry would be if formed by induction The gaps of geometry would then be the same as those of physics or chemistry The Sciences of Construction are a preliminary model of that which the experimental sciences might be Analogy of their arrangements Identity of the materials The only difference between our mental and real compounds is, that the first are the more simple Employment of mental compounds in order to understand real compounds Consequences The application of mathematical and mechanical laws is universal and necessary Refutation of Stuart Mill All numbers, forms, movements, and forces of physical nature are subject to necessary laws Very probably, all the physical changes in the...
