Reviews

Comprehensive guide! Its this type of very good read through. It is actually written in simple words and phrases rather than difficult to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.

This paper treats of the geology of an area el miles by twelve with the city as a renter. Albuquerque is the chief city of the Territory and is the junction point of the Atchison, Topeka Santa Be and the Santa Fe coast lines. The New Mexico Central, under construction, enters the area from the east, through the Menaul School arroyo and has its terminal at Albuquerque. The Rio Grande, carrying great amounts o-and and silt, flows through the middle of the area from north to south and supplies water for irrigation to many acres of land in its immediate valley. The accompanying map gives the main cultural and geological features. The contours are taken from the U.S. Geological Survey topographical map of Albuquerque Quadrangle. The survey is not accurate as to detail both on account of the large contour interval and the apparent hastiness of the survey. few minor corrections have been made by means of an aneroid barometer. This paper was prepared and the held work undertaken as a study of the Tertiary and Quaternary Geology of the valley and presented in partial fulfillment of the requirements for the Bachelors degree in the University of New Mexico. The work has been done under the direction of Dr. W.G. Tight, President of the University, to whom the writer is indebted not only for instruction and training, but for a multitude of facts drawn from his abundant knowledge of...
